

TaxValues™ Public Works

TaxValues™ Public Works is a robust water/sewer application engineered by Point Software, Inc. to manage all DPW needs related to billing and posting. Water/sewer billing is one of the most localized types of municipal billing. A municipality's billing approach can be virtually unique, as it is defined by a variety of factors that include billing method (flat rate or consumption); length and number of billing cycles; and implementation of early payment discounts, annual maintenance fees, and/or step rates. The flexibility of TaxValues™ Public Works readily accommodates the diversity of adopted water/sewer billing approaches. Water/sewer posting can be equally complex, which is why Point designed TaxValues™ Public Works for maximum automation at both the batch and account level.

Water/Sewer Billing Features

- Electronic and radio capture device interfaces
- Early payment discount calculation and control
- Alternative rate tables, premised on meters
- Maintenance fees with inclusion to any billing cycle
- Combination billing for multiple fixed fees and consumption billing
- Final bills, estimated bills and service bills
- Daily allowance calculations
- Incremental billing with periodic reset to base calculations
- Equivalent Dwelling Unit (EDU) multipliers
- Conversion of mixed meter types for gallon and cubic foot meters
- MWRA billing
- Adaptation to customer-designed bill forms framed for data templates
- Leak detection notification
- Rate usage classification recapture

Water/Sewer Posting Features

- Bar code printing and scanning of bills
- Lockbox service option
- Online payment exchange option
- Automated payment distribution at account level to appropriate posting categories for open balance items
- Quick Posting
- Credit balance rolling batch utility
- Automated credit balance rolling at account level for open balance items
- Unbalanced Payment Auditor
- Payment balancing reports
- Payment date locking utility
- Lien list creation tools for turnover to the assessors' office
- Account history recall
- Paid items masking
- Statement of Account
- Proof positive payoff amounts to any date

Don't let your water/sewer revenue go down the drain!

TaxValues™ Public Works provides a number of tools to maximize your water/sewer collection:

- Recapture lost income from delinquent payments through the lien list creation process.
- Optimize the efficiency of your department with data capture technology for reading meters and scanning bills.
- Ensure accuracy to the penny with built-in balancing tools.

System Requirements, Client Machines

Operating System	Windows® XP Professional Service Pack 2 or better
Processor	Pentium® or Core™ Duo (or comparable) 2.0 GHz or greater
Memory	2.0 GB minimum
Video Card	Optimum quality to support hi-resolution graphics
Network Adapter	NIC capable of supporting 10/100/1000 Mbps or wireless
Browser	Mozilla Firefox 3.0.16 or higher
Other Software	Microsoft® Office Professional, Adobe® Reader®

System Requirements, Server Scalable to User Counts*

Operating System	Windows Server® 2003/2008
Database Engine	InterSystems Caché® post-relational database Learn more at: www.intersystems.com
Processor	Intel® Core™ Duo (or comparable) 2.6 GHz or greater
Memory	2.0 GB - 8.0 GB
Hard Drives	<u>Primary:</u> 73 GB or greater <u>Secondary:</u> Equal in size to the primary <u>Mirroring and Duplexing:</u> RAID 1 configuration
Video Card	16 MB or greater video card capable of running 800x600 resolution
Network Adapter	NIC capable of supporting 10/100/1000 Mbps or wireless
Support	Remote desktop or GoToMyPC.com account
Power Backup	1440 VA uninterruptible power supply (UPS)
Internet Connectivity	Business Class DSL or T1
