

TaxValues™ Abatement Exemptions

TaxValues™ Abatement Exemptions transforms abatement and exemption handling into an efficient, almost effortless task. Designed for use with real estate and personal property commitments, this software equips assessors with an array of methods for streamlining the abatement and exemption process.

Recurring Exemptions

The vast majority of property exemptions issued in a municipality recur year after year, so TaxValues™ Abatement Exemptions offers a way to bypass the need to reenter the exemption information on an annual basis. The application contains utilities to clone the existing exemption records then roll over the pertinent ones to the new fiscal year and post them.

Versatile Tax Adjustments

TaxValues™ Abatement Exemptions gives assessors the option to adjust the tax amounts using defaulted values, a valuation adjustment or direct entry of the credits to the original tax amounts. The system will automatically and accurately calculate the new tax amount.

System Tables

System tables, such as the comments and abatement reasons tables, store standard text for insertion by entering the appropriate table code. This feature trims data entry time and allows the system to group accounts for reporting. For maximum flexibility, users are permitted to define an unlimited number of table codes.

BOA to Collector Transfer

Once the assessors have finished processing abatement and exemption requests, turnover to the collector's office is a simple procedure due to seamless integration with TaxValues™ Collector. An export/import process transfers the information to the collection system and a batch posting mechanism automates the posting to the relevant accounts. Control totals and error checking help ensure that the transfer occurs in a flawless fashion.

System Requirements, Client Machines

Operating System	Windows® XP Professional Service Pack 2 or better
Processor	Pentium® or Core™ Duo (or comparable) 2.0 GHz or greater
Memory	2.0 GB minimum
Video Card	Optimum quality to support hi-resolution graphics
Network Adapter	NIC capable of supporting 10/100/1000 Mbps or wireless
Browser	Mozilla Firefox 3.0.16 or higher
Other Software	Microsoft® Office Professional, Adobe® Reader®

System Requirements, Server Scalable to User Counts*

Operating System	Windows Server® 2003/2008
Database Engine	InterSystems Caché® post-relational database Learn more at: www.intersystems.com
Processor	Intel® Core™ Duo (or comparable) 2.6 GHz or greater
Memory	2.0 GB - 8.0 GB
Hard Drives	<u>Primary:</u> 73 GB or greater <u>Secondary:</u> Equal in size to the primary <u>Mirroring and Duplexing:</u> RAID 1 configuration
Video Card	16 MB or greater video card capable of running 800x600 resolution
Network Adapter	NIC capable of supporting 10/100/1000 Mbps or wireless
Support	Remote desktop or GoToMyPC.com account
Power Backup	1440 VA uninterruptible power supply (UPS)
Internet Connectivity	Business Class DSL or T1
